

## WIPSe upgrade kit

To benefit from the userfriendly WIPSe software, it's now possible to upgrade existing robots to the new standard. It's possible to convert old programs into the WIPSe software. This upgrade kit is available for all eDesign robots with W-HP10 hand held controller.

## Free programming

The operator make the programs without any restrictions.

By using the updated wips symbols this mode allows maximum flexibility even for more complex applications.

Our symbol based solution makes programming easy to learn.

This programming method offers the user unique opportunities.
